1. Executive Summary

Events Education & Workforce Development Federation Inc. welcomes the opportunity to provide input on the Development of an Artificial Intelligence (AI) Action Plan. As a key supporter of the events industry, encompassing corporate events, personal events, fairs, festivals, performances, sports, trade shows, political conventions, and fundraising. We recognize AI's transformative potential in driving innovation, workforce development, and economic growth.

The events industry is a significant contributor to the U.S. economy. In 2022, the U.S. conferences, concerts, and events market was valued at approximately \$339.86 billion. Projections indicate a strong growth, with the market expected to reach nearly \$660.7 billion by 2030, exhibiting a Compound Annual Growth Rate (CAGR) of 8.65% during this period.

This substantial economic footprint underscores the industry's critical role in employment and community engagement. The anticipated growth presents an opportunity to integrate AI technologies to further enhance productivity, attendee experiences, and workforce development.

We encourage policies that support AI adoption in event planning, logistics, audience engagement, and workforce expansion while addressing data privacy, cybersecurity, and ethical AI use. Our response highlights key recommendations to leverage AI for enhanced productivity, workforce growth, and industry sustainability.

2. AI's Role in the Events Industry

The events industry is a vital economic driver, supporting millions of jobs and contributing significantly to revenue generation. As events become increasingly complex and attendee expectations rise, AI-driven solutions offer opportunities to streamline operations, enhance audience engagement, and optimize workforce efficiency.

2.1. Event Planning & Logistics Optimization

AI-driven software enhances event planning by automating scheduling, logistics, and resource management. Key capabilities include:

- a. **Venue Selection & Optimization:** AI-powered platforms analyze historical data, attendee demographics, and location preferences to recommend ideal venues based on cost, accessibility, and expected foot traffic.
- b. **Automated Scheduling & Coordination:** AI-driven automated scheduling tools optimize event timelines, coordinate speaker availability, and prevent conflicts.

- c. **Predictive Demand Forecasting:** Machine learning models analyze ticket sales, weather conditions, and economic trends to forecast attendance, helping organizers manage inventory, staffing, and security more effectively.
- d. **Supply Chain & Vendor Management:** AI algorithms streamline supply chain logistics by optimizing catering, equipment rentals, and vendor coordination, reducing delays and cost overruns.

2.2. AI for Workforce Development & Training

As the industry evolves, AI-powered workforce development tools can address labor shortages and upskill professionals:

- a. **AI-Driven Talent Matching:** AI-based job platforms match event professionals with roles based on skill sets, experience, and location. These platforms can help streamline recruitment in real-time.
- b. **Virtual AI Trainers & Simulations:** AI-powered virtual assistants and VR simulations train event staff on emergency procedures, customer service, and logistics management, enhancing preparedness for large-scale events.
- c. **Real-Time Performance Analytics:** AI assesses staff productivity and efficiency, offering real-time feedback and customized training recommendations.

2.3. AI in Marketing & Audience Engagement

AI enhances audience engagement by delivering personalized experiences before, during, and after events:

- a. **Chatbots & AI-Powered Customer Support:** AI chatbots provide 24/7 real-time assistance to attendees, handling ticket purchases, FAQs, and navigation support via voice and text.
- b. **Personalized Content & Recommendations:** AI analyzes attendee behavior, interests, and past event history to suggest relevant sessions, exhibitors, or networking opportunities tailored to individual preferences.
- c. **Automated Social Media Marketing:** AI-powered platforms generate and schedule personalized content, track engagement, and optimize ad placements for maximum outreach and ticket sales.
- d. **Sentiment Analysis & Audience Insights:** AI analyzes social media discussions, reviews, and attendee feedback in real-time, helping event organizers adjust programming and marketing strategies accordingly.

2.4. AI for Security & Risk Management

AI strengthens event security by identifying threats in real-time and enhancing crowd management:

- a. **Facial Recognition & Biometric Security:** AI-powered facial recognition ensures secure and seamless check-ins, reducing wait times and improving security at entry points.
- b. **Threat Detection & Anomaly Identification:** AI-driven surveillance systems analyze video feeds in real-time to detect suspicious behavior, unattended objects, or potential security breaches.
- c. **Predictive Crowd Management:** AI models predict crowd movement patterns, allowing organizers to proactively adjust layouts, allocate security personnel, and prevent overcrowding.
- d. **Cybersecurity for Online Events:** AI-driven security solutions detect and mitigate cyber threats, such as hacking attempts, data breaches, and fake registrations, ensuring a secure virtual event environment.

2.5. AI Applications for Post-Event Sales and Lead Generation

AI-driven sales and lead generation tools help exhibitors, sponsors, and event organizers maximize revenue opportunities:

- a. **AI-Powered Lead Scoring & Targeting:** AI analyzes attendee data, past interactions, and purchasing behavior to identify high-value prospects for exhibitors and sponsors.
- b. **Automated Networking & Matchmaking:** AI-driven platforms match attendees with exhibitors, sponsors, or other participants based on their interests, maximizing engagement and business opportunities.
- c. **Real-Time Sales Insights & Forecasting:** AI-powered analytics provide real-time insights into ticket sales, sponsorship performance, and exhibitor ROI, enabling better data-driven decision-making.
- d. **Conversational AI for Lead Capture:** AI chatbots and voice assistants engage attendees, collect lead information, and schedule follow-ups with exhibitors, automating the sales funnel.
- e. **Dynamic Pricing & Revenue Optimization:** AI optimizes ticket pricing and sponsorship packages by analyzing demand trends, competitor pricing, and real-time engagement metrics.
- f. **Post-Event Sales Analytics:** AI tools analyze attendee engagement, sponsor interactions, and exhibitor performance to help businesses refine their sales strategies for future events.

2.6. AI for Sustainability & Efficiency

Sustainability is a growing priority in the events industry. AI plays a role in reducing waste, optimizing energy consumption, and promoting eco-friendly initiatives:

- **AI-Driven Energy Management:** Smart AI systems monitor and adjust lighting, HVAC, and power consumption based on real-time venue occupancy to minimize energy waste.

- **Waste Reduction & Resource Optimization:** AI-powered predictive analytics optimize food and material distribution, reducing waste from excess catering and promotional materials.
- **Green Transportation & Logistics:** AI-based route optimization tools improve transport efficiency, reduce carbon emissions, and encourage eco-friendly commuting options for attendees.

3. Recommendations for AI Policy Actions

To fully realize AI's potential in the events industry, it's important to prioritize policies that drive AI innovation, workforce development, security, and responsible implementation. The following critical areas impact the industry, including AI upskilling, ethical AI use, cybersecurity, and economic incentives.

3.1 Workforce Development & AI Education

As AI adoption grows within the events industry, there is an urgent need to train and upskill the workforce to leverage AI tools effectively. Policies should support:

- AI Training and Certification for Event Professionals:**
 - Establish government-backed AI training programs tailored for event planners, marketers, and technical staff.
 - Provide AI literacy programs focused on automation, data analytics, and AI-driven customer engagement.
- AI Integration in Higher Education and Vocational Training:**
 - Expand AI-related courses in event management, marketing, and hospitality programs at universities and community colleges.
 - Encourage the creation of AI-specialized vocational training tracks for workers transitioning into AI-enhanced event roles.
- Public-Private Collaboration on AI Upskilling:**
 - Partner with AI technology companies to offer workforce training grants and subsidized AI certifications for event professionals.
 - Foster industry-academia collaborations to develop research programs that explore AI's role in the future of live events and exhibitions.
- AI-Powered Employment Matching Platforms:**
 - Support the development of government-funded AI-driven job placement platforms that match event professionals with employers based on AI-driven skills assessments.

3.2 AI Research & Innovation in Event Technologies

To encourage AI-driven transformation in the exhibition and events industry, policies should promote research, funding, and technology development through:

a. AI R&D Grants for Event Technology Startups

- Establish federal funding programs to support startups developing AI-driven event management, marketing, and attendee engagement tools.
- Provide tax incentives for businesses investing in AI R&D for live and virtual events.

b. Encouraging Open-Source AI Development for Events

- Support the creation of open-source AI models designed to optimize event logistics, personalization, and operations.
- Provide grants for universities and research institutions developing ethical AI frameworks for event applications.

3.3 Ethical AI Use, Privacy & Security in Event Management

The adoption of AI in events must be accompanied by strong regulatory frameworks that ensure data privacy, ethical AI use, and cybersecurity. Key policy actions include:

a. AI Regulation for Event Data Privacy

- Establish national standards for data protection in AI-driven event systems, ensuring compliance with GDPR-like regulations for attendee information.
- Require AI-based facial recognition and behavior tracking systems to adhere to transparency and opt-in policies.

b. Cybersecurity for AI-Enabled Event Systems

- Enforce cybersecurity standards for AI-driven event registration, ticketing, and networking platforms to prevent data breaches and AI model attacks.
- Provide government funding for AI cybersecurity research specific to large-scale public and corporate events.

3.4 AI in Economic Growth & International Competitiveness

The U.S. exhibition and events industry is a key driver of economic growth, facilitating business expansion, trade promotion, and global networking. To promote its leadership position in the global economy, the industry must leverage AI to enhance competitiveness, boost efficiency, and expand international reach.

a. AI-Powered Business Growth Incentives for U.S. Companies

• Provide AI Tax Incentives & Grants:

- Offer tax credits and federal grants to U.S. companies that implement or use AI solutions.
- Establish an AI Innovation Fund to support small to mid-sized event businesses in adopting AI-driven technologies.

• Support AI-Driven Export Growth for U.S. Event Companies:

- Provide financial incentives for U.S. companies using AI to expand into international markets through events, trade shows, and global exhibitions.
- Enable AI-powered tools that help U.S. event companies identify global market trends, optimize pricing strategies, and personalize marketing for international audiences.

b. AI-Driven Market Expansion for U.S. Companies in Global Trade Shows

• AI-Powered International Networking Platforms:

- Develop government-supported AI-driven matchmaking platforms that connect U.S. businesses with potential global buyers, investors, and partners at international trade events.
- Utilize AI recommendation engines to personalize B2B matchmaking, increasing high-value business deals for U.S. exhibitors.

c. AI for Cross-Border Market Intelligence:

- Provide U.S. companies access to AI-powered market intelligence tools that analyze global trade show data, attendee behaviors, and emerging industry trends to help companies target the right international markets.
- Invest in AI-driven predictive analytics for forecasting international demand for U.S. products and services showcased at trade events.

d. AI-Enhanced Event Infrastructure for International Trade Leadership

- For U.S. businesses to remain competitive on a global scale, trade shows and conventions must leverage AI to create world-class, tech-driven event experiences:

e. **AI-Optimized Convention Centers & Trade Hubs**

- Encourage the development of AI-powered “smart” convention centers that use AI to enhance operational efficiency, reduce costs, and improve attendee experiences.
- Establish funding programs for AI-driven venue optimization, including real-time crowd management, AI-based scheduling, and intelligent infrastructure automation.

4. Conclusion

The events industry is a key economic driver, and AI presents a major opportunity to enhance workforce development, operational efficiency, and global competitiveness.

AI represents a pivotal opportunity to transform the events industry, making it more efficient, productive, secure, and globally competitive. By taking proactive policy measures, the U.S. government can empower businesses, create jobs, and drive economic growth while maintaining ethical and responsible AI development.

We welcome the opportunity to collaborate in shaping AI policies that enhance workforce readiness, drive innovation, and position the U.S. as a global leader in AI-driven events. We look forward to continued discussions and partnerships to advance AI adoption in this vibrant industry.
