Hello Faisal. Details re: my work: [thebiggestshort dot substack dot com/p/natsec-and-trump-money-via-my-microsoft-amazon-vc-praised-ai](https://thebiggestshort.substack.com/p/natsec-and-trump-money-via-my-microsoft-amazon-vc-praised-ai) (Substack dot com is a popular content-hosting platform); excerpt (minus Web links):

My Microsoft-/Amazon-/VC-praised* AI-preneurship is a key to President Trump achieving “stable mutual deterrence” (SMD), given: 1) autocrats with nukes who perceive themselves to be imperiled by ongoing research-advances (esp. in molecular-genetics, neuroscience and AI), 2) my SMD-blueprint (SBP), via my tenure since 2016 as an/the-world’s-most accidental threat-analyst; via SBP yielding SMD: 1) Rockefeller of the AI economy (e.g., President Trump delegates emergency/war powers en route to legally owning 80% of “my” Amazon.com of customized-education and AI***; CE-for-AI will be to the AI economy what oil has been to the industrial economy); 2) undoing of a catch-22 worsened by DeepSeek: China’s AI-progress decreases said nuke-risk-to-U.S. *by increasing risk-to-U.S.* of China being first to an Artificial General Intelligence that confers decisive military-advantage—and the reverse is true: less AGI-risk-to-U.S. means more nuke-risk****.**

** This perception is plausible/likely (e.g., fits relevant data); details below (db).
