To Whom It May Concern,

I am a writer, filmmaker, and photographer.

So-called "A.i." technologies like ChatGPT and Dall-E are based on the automated, mass theft of my work and the work of millions of creators like me.

So-called "A.i." text technologies like ChatGPT constantly present false information as fact, spreading dangerous ignorance and disinformation.

So-called "A.i." technologies like Dall-E enable the creation of fake imagery that can spread dangerous political disinformation.

So-called "A.i." technologies like ChatGPT consume massive amounts of energy and water and endanger the environment.

My conclusion is that the current implementation of these technologies is immoral, unethical, and dangerous and violates copyright law. These technologies should not be encouraged, aided, used, or subsidized by the government in any way.

One very specific suggestion is that a so-called "A.i." company should be required to obtain the permission of every single creator for every single work it wants to use before it uses it, and the company should be required to immediately remove all work for which it lacks such permission from its databases.

Thank you for your attention.

Greg Pak

This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution. But I do not, obviously, give anyone permission to feed this document into a so-called "A.i." database or program.
