To Whom It May Concern:

As a private citizen, I am AGAINST loosening copyright protections or any other legal protections and regulations for the benefit of private companies engaged in so-called "AI" or "Artificial Intelligence" research. The pipe dream of computer-generated art and expression is at best an excuse to devalue human labor and thought. My words and thoughts are more than mere fodder for "training" a computer to approximate my human birthright of free expression. Thank you for your time.
