J.C.

While our administration is currently in the good graces of tech, with unregulated Ai Elon Musk can replace the governments power as he has the face and voice of anyone he wants. Ai has the power of disruption (not a good thing despite silicon valleys fascination of the term). News cant be trusted. Social cant be trusted. At some point ruining all trusted sources will cannibalize this admonostrations efforts tp create a false world. Trump is giving way to his replacement. He has built the ramp and lubricated the wheels for all his efforts to usurp him as the jackals he surrounds himself with realize he stands on a cliffs edge. I understand he does not act in the interest of humanity, as he has worked extensively to undermine it. I hope he will at least have enough self preservation to put in regulations, if not for us them him.
