Hello Faisal D'Souza,

The initiative to allow legalized theft by way of Ai because of false claims by criminally irresponsible tech business people is not something the United States government should allow.

Many people have already suffered irreparable harm because of Ai, whether by way of mass layoffs or because of materials with legal copyrights being stolen, scrapped, exploited, misappropriated, and more. There have also been safety issues because of misinformation and fraud due to the use of Ai.

Copyright protections are an essential safeguard against predatory business practices that would harm any person, group, or business. We need stronger laws and regulations to fight against the misuse of this technology, whether Ai, generative Ai, or AGI.

You may have closed the comment section, but this fight has only just begun, and rest assured that we the people outnumber those who seek to threaten the United States with Ai, whether foreign or domestic.

Protect the United States. Do not support Ai.

Sincerely,
James
