

Joseph Itzkowitz

This is a URGENT IMPORTANT MESSAGE: Since Jan 2019, I have been tracking AGI, singularity, rise of the machines in ****DETAIL**** , in labs across the globe. The exponential growth in tech, science is accelerating at a pace that is becoming harder and harder to keep track of. I am putting together the "Singularity " pages ,where you can literally see the pattern emerging as far as the game - changing, SHOCKING AI ,science, breakthroughs. We need to create a an agency called AIC, artificial intelligence command, and or AI center, where we follow all the latest breakthroughs , follow all the progress,need to come up with a program to deal with the nonlinear growth of the machines vs human, linear understanding. At this time (Since Jan 2019) the machines are accelerating at such a exponential rate, that the human intelligence is quickly behind the machines. Some examples in Jan 2019 alone: AI developed a theory of mind, by putting ITSELF in other shoes. 2 Amazon AI agents colluded ON ITS OWN, to manipulate prices. AI bot was caught cheating, hiding code from humans. AI developed a sense of time A ROBOT ARM conducted 100, thousand science experiences ,ON IT'S OWN, with OUT humans programming it. These ACTUALL Breakthroughs, in labs across the globe (2019) are only a few out of thousands that I am gathering. Looking forward to working with you. Sincerely, yosef mordachai Itzkowitz, independent scientist, researcher. Yosef Mordechai on @LinkedIn to reach out.
