Hello,

As a person firmly supportive of the human experience and of humanity's rights, I strongly oppose this proposal that will grant AI free reign to prey on all of our creations. It has already had a significantly detrimental effect on many people's lives and honestly, limited beneficial effects for the majority of society.

A service with benefits few does not deserve immunities from culpability for crimes of theft (which is all that "Generative AI" amounts to). Please reconsider continuing to allow the thieves who created this monstrosity to get away with their deeds.

Sincerely,

K Kolganov
