Dear Mr. D'Souza,

The Coalition for Academic Scientific Computation (CASC) appreciates the opportunity to contribute to the Artificial Intelligence (AI) Action Plan as outlined in the recent Request for Information (RFI). CASC represents leading research computing and data centers across academia and national laboratories, committed to advancing high-performance computing, data science, and artificial intelligence in support of scientific discovery and innovation.

We have highlighted the key priority actions our 105 U.S member institutions have identified that support AI-driven research and innovation while ensuring balanced policies that foster collaboration across academia, industry, and government. If there are specific areas where additional input would be particularly valuable, we would welcome the opportunity to provide further insights from the research computing and data science community.

We appreciate your time and consideration.

Warm regards,
Kathryn Kelley
CASC Executive Director
