Good evening, I am an artist, and content creator, and I urge our countries leaders to take a stand against this plan. AI Training having access to copyrighted materials puts everyday American citizens, such as myself, at risk of losing future work. And with the aggressive development of Generative AI, we have already begun to see a overwhelming impact on the creative working class of the United States. Generative AI can, will, and already has put a strain on our economy. With its overwhelming power supply demand, and job loss, which causes less tax paying workers from helping fuel our economy. In both my community and my home I have witnessed the impacts that uncontrolled Atrifical Intelligence training can have, in both income loss, and in well being due to that loss. I ask that you take real consideration to both the short term, and long term consequences of unrestricted Artificial Intelligence training will have on the American people. Thank you for your time.
