Good day Mr. D'Souza,

This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.

I strongly recommend reinstating executive order 14110 from Oct 30, 2023. Policy should also reinforce protections and privacy for users, ensure high ethical practices. All of this should be based in diversity, equity, and inclusivity values that protect our citizens from white supremacist propaganda, racist values, homophobic mentalities, and sexist practices.

The AI action plan should LIMIT industry's ability to access personal information and governmental documents (such as social security numbers, health history, etc). AI should also be based in sound scientific facts as well as sociological principals that have been vetted by experts in those fields. There should be a non-partisan, non-corporate entity that monitors the scope and reach of AI in our systems.

Thank you for your consideration,

Laurie Allen-Requa
