According to <https://www.federalregister.gov/documents/2025/02/06/2025-02305/request-for-information-on-the-development-of-an-artificial-intelligence-ai-action-plan>, the goal is to "sustain and enhance America's AI dominance, and to ensure that unnecessarily burdensome requirements do not hamper private sector AI innovation".

These are the wrong goals. The government should be working to protect the environment and individuals' privacy and livelihoods. AI is used as an excuse to vacuum up everyone's information. And generative AI has proven itself to be almost completely useless, at the cost of a livable environment. The aim of the AI business is to replace workers. AI will never have the creativity or intelligence to effectively replace workers, so it will only serve to provide customers a worse experience, while putting more people out of work, making the country a worse place for everyone.
