CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

LLMs and similiar "AI" models are created through the wholesale violation of copyright.

Unless they create a paid opt-in model for contributing to data sets, they are creating their models through theft.

If it's not legal to download a movie off the internet, it's not legal to scape it to feed these models.

Additionally: they are weighted models and don't actually learn. Saying they do is misleading, bordering on fraud.
