Good evening.

I have been aware about recent plans from AI companies, such as Open AI, trying to push for more control and using copyrighted material. As both a practicing artist and someone who appreciates artistic mediums as a whole, I do not believe generative AI has a place in this country. It has profited off of theft, stealing from those who actually earned their talents, in an age when such work isn't as appreciated as it should be, and as a whole, generative AI is overhyped and is likely fleeting. So if anyone is listening and actually cares about the American people, I would implore you to PLEASE stop these generative AI companies from making things worse than they already are. Thank you.

-Lucas L.
