I am a citizen of the United States. I am an art hobbyist and do not make money off of my art, but I know many others who do. I believe that unregulated AI will be detrimental to the rights of creatives. In particular, it will be damaging to small artistic business owner. In addition, I do not believe that any sort of "AI Dominance" will be of use to the United States. There is a danger on relying on an unstable technology to run businesses or national security. It has been shown that the AI models will develop unwanted behaviors without human input (<https://time.com/7259395/ai-chess-cheating-palisade-research/>). Ultimately, allowing AI companies unregulated access to data will be detrimental to the rights of American citizens.

Lydia Haley

When AI Thinks It Will Lose, It Sometimes Cheats, Study Finds

When sensing defeat in a match against a skilled chess bot, advanced models sometimes hack their opponent, a study found.
