Mary Duncan, [REDACTED]

""AI"" is nothing more than a sham that spreads harmful disinformation at the cost of Everyone on the planet. AI, NFTs, etc. will pull the rug out from normal citizens with no billions to line their pockets, all while siphoning off the creativity and hard work of writers, artists, and animators. Real people who make real work with their own hands. The world is burning for your hubris, and if you continue encouraging it all of the climate related deaths and refugees will be on your hands!! YES TO HUMAN ART, NO TO AI!! STOP KILLING THE PLANET!!!
