CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Under no circumstances should the government allow big tech and large language model companies to freely harvest the collective creative works of America's artists without appropriate compensation. Generative AI as it exists currently is little more than a machine for mass intellectual property and copyright theft. If artists and creators aren't to be financially compensated then big tech companies should have no right to exploit other people's work for their own private profit.
