Using AI to control weapons functions.

1. Every single firearm has a micro chip AI " GPS Tracking System"

The concept... Every Firearm knows it is in a " No Shoot Zone " just like GPS in a handgun or assault weapon, knows it is in a school, or a church, movie theater, grocery store, apartment complex, etc...

2. Therefore the hand gun or assault weapon will automatically shut off and not allow it to fire any bullets if the trigger is pulled in the designated " No Shoot Zone" area.

Or .. immediately after 1 round is discharged in the designated " No Shoot Zone " area then the firearm will lock and not allow anymore bullets to be discharged.

I am a U.S. Army Military Police officer Veteran.

I am currently in the California State Guard my current rank is 1st Lieutenant

My son is currently a Submariner in the United States Navy.

I am currently a State of California PPO licensed Security Guard Company Business Owner here in Los Angeles.

I hope to receive a response to my idea asap.

Best Regards,

MICHAEL ALDAPA

Owner/ CEO

TAURUS SECURITY FORCE
