“This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.”

AI companies must now be immune to copyright infringement lawsuits. Actual human creators must maintain their rights, without concern that AI companies will take their work and use it in any way. AI is artificial, but not intelligent. They are simply large complex statistical models that even their creators do not understand. They rely on information that often is created by others without their consent. That is immoral and unethical, and ultimately will destroy the creative process of people and replace them with computer mishmash. Do not allow AI companies any means of avoiding meaningful copyrights.

Michael Burns-Kaurin
