Dear Flavio Peres and Commissioner Michael Peters, GSA

Please see the attached House AI-Task Force Report (Final) that is making its way through Congress and up to Federal Agencies. Key Recommendations contained in this include (Page XI):

- **Encourages Federal Agencies to expand and welcome Public-Private Partnerships for AI R&D efforts....the same as what we are asking GSA for.**
- Support AI R&D by Small Businesses (like my VOSB company)
- Explore how to accelerate scientific discovery across AI disciplines
- Promote development of infrastructure and data to enable AI R&D

We hope that GSA will see this as a Guidepost for future Public-Private Partnership (PPP) with my team...and that GSA will collaborate with our AI Technical Centers of Excellence-COE (at your Charlottesville, VA FEI Property)...so that we can help foster greater AI synergies and benefits across your entire GSA.

Dear Commissioner Michael Peters, and GSA-PBS,

I am so very thankful to you, for personally responding to my outreach.
It is very heartening to know that our messages are being received & considered.

I am grateful for introduction to **Flavio Peres**. I hope to understand his process that GSA will use to dispose of this FEI Campus, and to be included in that.

FLAVIO PERES:

As noted below, I have already reached out to a number of Federal Agencies (including Military) that could help us re-purpose this FEI property in a way that brings our AI-expertise and still best suits Federal Govt needs.
I think our Proposed Use of FEI Property for AI-Technology Centers of Excellence-COE hits all of GSA's more important Efficiency topics: AI-embedded Smart Buildings; AI-enabled Energy Efficiency & On-Site Energy Infra; AI-enhanced Fleet Mobility & TeleMatics; etc.

From our AI-Technology Centers of Excellence-COE, GSA will be able to accomplish all your desired AI Use Cases (see below graphic):

- <https://www.gsa.gov/technology/government-it-initiatives/artificial-intelligence/how-were-using-ai/ai-use-case-inventory>
- <https://www.gsa.gov/technology/government-it-initiatives/artificial-intelligence/ai-guidance-and-resources/ai-compliance-plan>

I and my company have a long history of being involved in various GSA programs:

- I formerly was Director of Federal BusDev for one of DC's pre-eminent Architecture firms, when the firm received GSA Design Award for Jefferson Clinton Federal Building (Facade)...and when they were the Chief Architect for GSA's Master Planning of the Foreign Affairs Security Training Center (FASTC).
- My LilyPad Airways company is in process of hiring your recently-RIFed GSA Manager who formerly led the GSA Fleet Vehicle Management & TeleMatics...we will task him to lead our AI-Ground Mobility Center of Excellence-COE activities.
- My company has spent past few years supporting GSA-PBS activities related to EVSE Infrastructure rollout (prior to latest cuts) and helped several companies capture those GSA \$2-Billion BPA Contracts. This included advising them on FedRAMP & CyberSecurity Requirements imposed by GSA.
- My company is the BusDev advisor to an 8(a) General Contractor currently performing Construction-related & O&M Task Orders on GSA properties in the DMV region.
- My company has previously provided GSA with fairly-detailed Proposals for upgrade of the GSA DMV-region Buildings for Grid Integrated Efficient (Smart) Buildings efforts, and encouraged GSA to consider integrating those in the planned New Consolidated FBI Headquarters projects. We also proposed a comprehensive Community-based MicroGrid & Distributed Energy-DERs solution to GSA properties in DMV region.
- My company has approached to newly-appointed DOT Secretary Sean Duffy and proposed our AI-Enabled Transportation Center of Excellence-COE for Ground Operations and Advanced Air Mobility-AAM.

Standing-by to hear how we can be involved in your disposition of this FEI property.

Use case	Intended purpose and expected benefits	Stage of development	Rights or safety impact?
Acquisition analytics	Takes detailed data on transactions and classifies each transaction within the governmentwide category management taxonomy.	Implementation and assessment	Neither
AWS CAPTCHA solver	Part of a project to automate actions in AWS console using Selenium. We developed an AI model that can solve AWS CAPTCHA so our automated system won't be blocked for being detected as a bot. The model is used in an AWS Lambda that uses a headless Selenium driver. The model was trained from scratch using Tensorflow. We have discussed making a more general form of this solution that could be applied to other AI and ML problems.	Initiated	Neither
Category taxonomy classifier	Classification of obligation transactions in to GWAS subcategories when the existing FPDS coding scheme, PSC/NAICS, is insufficient for positive classification of a transaction.	Implementation and assessment	Neither
Category taxonomy	Uses token extraction from product descriptions to more accurately shape intended markets for PSCs.	Retired	Neither

Mr. Erickson,

Thank you for your interest. We are seeking to dispose of the FEI property and welcome your interest in participating in the process. I have copied Flavio Peres who leads our disposition team and can keep you updated as the process progresses. Please let us know if you have any questions in the interim.

Best,

Michael

U.S. General Services Administration

Michael P. Peters
Commissioner of Public Buildings Service

On Thu, Feb 27, 2025 at 11:14 AM M. E. wrote:
Dear GSA and Public Buildings Service-PBS,

I noted the email sent by Assistant Commissioner for Facilities Management Andrew Heller, that GSA's Public Buildings Service-PBS is looking to eliminate 3,557 positions through a nonvoluntary Reduction in Force (RIF) — about 63% of its total workforce. Mr. Heller indicated that PBS is pursuing “meaningful consolidation of space to occur and require less support,” which allows for consideration of reduced service levels for owned buildings.

That will help GSA comply with Presidential Order:

- <https://www.whitehouse.gov/presidential-actions/2025/02/implementing-the-presidents-department-of-government-efficiency-cost-efficiency-initiative/>

The executive order gives GSA 60 days to submit your plan to the Office of Management on the disposal of government-owned real estate “which has been deemed by the agency as no longer needed.”

PBS Commissioner Michael Peters has indicated that GSA is looking to cut its total real estate portfolio by 50%. Mr. Heller indicated that “GSA will introduce new technology, including AI, to improve efficiencies in the lease, acquisition and project management functions.”

Time is running out for GSA-PBS to comply with the Executive Order as pertains to Property Disposal or Lease Termination Planning.

My team is ready to assume the Lease on the FEI Property in Charlottesville, VA...and will use it to create the AI Centers of Excellence-COE that Mr. Heller needs to gain GSA efficiencies. I have already contacted the University of Virginia (AI divisions) and invited them to collaborate with

us on our Plan for FEI Campus.

I invite GSA-PBS, as well as the other Federal Agencies involved in Energy, Aviation, AI, etc. to join with my team in Public-Private Partnership to re-purpose the FEI Campus for our AI-COEs. I have already reached out directly and indirectly to the Agencies such as: OSTP; State Dept; FAA; Dept of Energy; INL; NREL; and US Military...allowing them to hear of our vision for FEI Campus. I have also reached out to the various (huge) IT & Investment Groups that were noted in the news as investing \$Billions in USA-based AI-Data Centers.

GSA has used Public-Private Partnerships (PPPs) in the past...most notably when you wanted to achieve Federal Energy Management goals. We are not proposing anything new to you...read the GAO report:

- <https://www.gao.gov/products/gao-16-776r>

Now we just wait for GSA-PBS to grant us the Lease for the now-defunct Federal Executive Institute-FEI.
