Hello,

I do not believe AI has a place in the future of the United States, and it is actively profiting off of theft from the livelihoods of millions of hardworking, skilled, and honest Americans. I also believe Generative AI like ChatGPT is an insult to our intelligence, compassion, and creativity, and to the very spirit of what it means to be human. It is clear that in the eyes of the American public, AI is but a fad, fleeting and inconsequential, as corporations push their AI features and settings that no one asked for or enjoys. It only leads to disappointment and boycott of the brand, which means lowering the brand's revenue. That's what brands and corporations care about, yes? Revenue, sales, and profits? Then stop including AI where it does not belong, especially in creative spaces for artists and writers, and any other place where human creativity is an absolute must and is and always will be inherently superior to an unoriginal plagiarizing machine. I am asking you to implement laws to protect these artists and creatives from plagiarism, theft of their art to train AI without their permission, and loss of their essential jobs to AI.

Thank you.
