I realize that I'm past the deadline for submission but I only found out about this call for information today.

In short, I do not want OpenAI or any other artificial intelligence company to have access to any of my communications or data. I don't want it in my life. I'm tired of seeing people, companies, and even the American government flog this thing like it's the second coming or a replacement for human intelligence when it's really nothing more than pattern recognition software.

I want the previous administration's laws and regulations regarding AI to stay in place. Thank you.

Misha Ramsey
