Cletus Chibueze Orji

May I humbly use this opportunity to express my passion and desire to be part of the team of key players in the new President Trump's executive order on the development of AI in America and around the world . Artificial intelligence programming and development will go a long way in finding solutions to many problems all over the world . May I humbly request that the development of AI should be made a little open to people around the world for their input . Areas to explore are many and major player should not limit their request for public input from only people in American soil . There are people in Africa who can make a reasonable contribution to the project . Please remember America is the watchdog of the world . Now for me I am in Africa (Nigeria) we have something to offer as a part of our contribution for the development of the project . No one is omniscient to knowledge . Can I be invited to be part of the expanding of project for something good can come out from Africa. Thanks Orji Cletus C
