I am messaging to list off reasons AI shouldn't be allowed to steal

- Misinformation:

AI has developed it's ability to make realistic photos, videos and audio content

Off of real people. People can use this to spread misinformation upon government officials, Citizens, celebrities, branding, and more. It would create doubt and paranoia to people and Cause wasteful use of time and energy such at court cases, data breaching, security and lack of control.

- It can affect jobs

While AI can be used to help with certain utilities like data organizing, business strategies, documentation,

Medical, Law, Government records, Translation, and even Transmission. AI can also affect creative works such as

Photography, writing, art and design, selling goods and services, and more. AI doesn't have the ability to think creatively

But export information that is commanded from text. We need to maintain that ability to use our minds and physical skills

To acquire better attributes to things and maintain an expansive variety of jobs!

I understand we want to thrive with new tools and tech, But we have to know the right way to use such things,

We have to use it for the impossible, not for what is already possible.
