Hi,

In regards to the recent Request for Information: Development of an Artificial Intelligence Action Plan - https://www.regulations.gov/document/NSF_FRDOC_0001-3479

I wanted to reach out as I have consolidated an objective framework, with succinct formula on what constitutes morality. I did not submit the work as I'm currently trying to conclude a book on which I can gain some form of financial compensation for trials faced leading to the formulation of the book.

Is there any party I could discuss this with further? Or perhaps when the book is finished I can forward the relevant material?

I believe the work to be simple, but impenetrable. I would very much like to see the material receive full scrutiny and solidify itself as a fundamental basis concerning the future of AI moral infrastructure.

Thanks,

Peter
