High-Priority AI Policy Actions for OSTP's AI Action Plan

The rapid advancement of artificial intelligence brings both immense opportunities and significant challenges. To ensure AI serves the public good while maintaining U.S. leadership in innovation, it is crucial to implement policies that promote transparency, fairness, and global competitiveness. The following *high-priority policy actions* aim to support the safe deployment of AI, mitigate risks and harm, and strengthen the United States' position as a global AI leader.

1. Enhance AI Transparency, Explainability, and Accountability

- a. Require AI providers in high-risk domains to develop transparency standards and public-facing explainability standards which will bolster accountability.

2. Mitigating Algorithmic Bias and Ensuring Fairness

- a. Require rigorous protocols to prevent AI systems from exacerbating existing social disparities.

3. Maintaining International AI Competitiveness

- a. Ensure US global leadership in advancing AI technology *and* safety by allocating all necessary resources to its development and oversight.

- b. Mandate critical sociotechnical safety mechanisms to ensure AI promotes social well-being.

4. **Establishing Algorithmic Registers and Human Algorithmic Review Boards (HARB)**

- a. Mandate the use of algorithmic registers for AI providers operating in high-risk domains.
- b. Create oversight bodies consisting of public and private stakeholders to evaluate the patterns of algorithmic outputs for bias and discrimination in high-risk domains.
 - i. *Evidence:* Global leaders, such as the City of Amsterdam, lead in AI transparency in their deployment of algorithmic registers.¹
