I do not believe AI has any benefit to the future of America.

After reading through this, I sincerely do not believe that "sustaining and enhancing America's AI dominance" would successfully promote "human flourishing, economic competitiveness, and national security."

Lifting restrictions on AI and improving its dominance wouldn't solve the problems we face in our every day lives, let alone solve what you "claim" to seek to achieve by doing this.

Something like this will put creators and organizations that heavily depend on creative and copyright laws into extreme danger as well as their livelihoods.

Consider this me officially and completely opposing this Development of the Artificial Intelligence (AI) Action Plan as well as similar plans.
