Royce Landrum

The government shake up and transparency are GREAT!! Keep up the good work, and shake until all the bad nuts are out of the trees and off the ground. My thoughts on AI: The goal of AI should be to assist, teach NOT to do the life tasks that humans need to do to stay active, alert, engaged and a vital contributing member to society. AI, should: have an override option; be easy to distinguish from a human, by look and/or voice inflections; and have the capability to teach course curriculums such as Foreign languages, mathematical sciences and disciplines: from elementary to PhD calculus; Accounting; Commerce. Sciences: physics; Astronomy; chemistry; biology; zoology; metrology; etc. Farming: Agriculture; Horticulture (how to grow a family garden); Botany; Husbandry. History; Reading; Composition: Writing (including cursive) Speech writing; Public Speaking. Business Administration; Engineering; Social Studies; Civics; Computer sciences; Web design and graphics; photography; REAL Journalism; Humanities; Religion (with strong emphasis on Christianity). Cooking; Child care; Home repair with basic carpentry; welding; mechanical repair and engineering; masonry; House painting (indoor / outdoor); Barbering; Cosmetology; Social Skills; Parenting. Music (basics of singing; how to play an instrument, to compose music, etc.), Art disciplines: painting (oils, water color; drawing); Dance; Acting, etc.; Crafting: Needle point; knitting; crochet; weaving; sewing / tailoring. DIY personal items: soap, detergent, etc Law disciplines: Criminal; Civil; Immigration; Environmental; Corporate, etc. Forensics. First Responder courses: Police; Firemen; Basic First Aid; Medical Fields: Psychiatry; Medical Triage; Human (for MD) and Veterinary (DVM); Surgical; The various specialties: Family practice; Emergency room, etc.; Eastern medicines; Massage Therapy; Physical Therapy; Occupational Therapy; Acupuncture
