Subject: [External] Request for Information on the Development of an Artificial Intelligence (AI) Action Plan
Date: Thursday, February 20, 2025 10:02:25 AM

Hello,

In response to requests for input from all interested parties on the Development of AI Action Plan.

I'm a Human Trafficking Abolitionist.

1. AI for Trafficking Detection & Prevention

- **Mandate AI-driven monitoring in high-risk industries:** Establish guidelines requiring the use of AI to detect trafficking patterns in hospitality, transportation, and online platforms.
- **AI in supply chain audits:** Implement AI-based tracking to ensure supply chains are free from forced labor.

2. Data Privacy & Protection for Victims

- **Secure AI-driven victim support tools:** AI should be used to provide encrypted, anonymous resources for victims while ensuring their data privacy.
- **Strict AI governance on biometric data use:** AI should not be used to track victims of trafficking without clear safeguards against misuse.

3. AI in Law Enforcement & Prosecution

- **AI-powered forensic tools:** Use AI for digital forensics to analyze traffickers' communication patterns and evidence across multiple jurisdictions.
- **Improve AI explainability for legal cases:** Ensure AI-generated insights are legally admissible and interpretable for court proceedings.

4. AI and the Dark Web

- **AI-driven dark web surveillance:** Strengthen AI capabilities in tracking human trafficking activity within encrypted and hidden online spaces.
- **Regulate AI-powered anonymization tools:** Enforce stricter controls on AI applications that allow traffickers to evade detection.

5. Ethical AI Development & Deployment

- **Ban AI tools that enable exploitation:** Prohibit AI-generated content (deepfakes, chatbots, etc.) from being used in exploitative ways, such as generating child sexual

abuse materials.

- **Regulate AI-driven recruitment platforms:** Ensure AI used in hiring doesn't inadvertently facilitate labor trafficking.

Kind regards,

Sabrina Stratford
