Subject: [External] AI Action Plan
Date: Tuesday, February 25, 2025 5:45:22 PM

1. No foreign AI apps should be permitted in the US
2. AI should be able to filter all explicit content.
3. AI should have cyber police to track scammers, trafficking and drugs. There should be a number to call to file a report or offense.
4. AI crime should have a consequence like real crime.
5. AI should have a way to create your own website and do web maintenance. This will save companies thousands of dollars.
6. AI research should be fact based, not opinion and should share the source of information.
