Sheetal Zunjur

artificial intelligent's are fraud. they take human place. they are not intelligence human like but they copy humans like chat gpt, google gemini, chat boat. these AI companies created robots but they have not creativity. HUMAN data transfer in ai. This is illegal. You have stolen someone privacy, someone private data. Nowadays Nobel prize delivered to AI research scientist. This is wrong. there are many scientist in world who research in another field in physics, chemistry & medicine. Machines are not future. They don't have capability to think and behave. AI just copied human. Humonoids robots are dangerous. So I want ban on this
