Shirley Stone

AI is only as intelligent as what is fed into its "brain" and the information that is stored for its access. Please be extremely careful that Leftist political doctrine is NOT made available to AI. It must be taught what is GOOD and what is EVIL. There is no better source for what is good and what is evil than the Holy Bible. The Founders of our nation used it to write the constitution and form our government. We were established as a Christian nation and that has not changed, no matter what certain presidents may have declared. Communist, Socialist, Marxist ideologies have NO part in our nation, and AI must be "taught" those ideologies are unacceptable. Someone's "morality" is going to be programmed into AI. It needs to be God's morality, as found in the Ten Commandments and throughout the Holy Bible. Just as English has been an unwritten Official Language of the USA, so is the Christian Faith the unwritten Faith of the USA. Great care must be taken to not allow AI to be improperly "taught" but to have Biblical values.
