Hello,

I'm writing regarding the request for comment about the "AI Action Plan." I'm an illustrator. I rely on owning the copyright to my work. It is my work. Allowing AI companies to use copyrighted material without compensation or permission is straight forward theft. They are plagiarising our work and making billions while artists are pushed out of their jobs. It's disgusting. The AI bubble is already about to crater. The programs cannot do what they promise, and even if they could, that does not justify theft. Beyond that, there are massive concerns for the way they allow for the spread of disinformation and propaganda, as well and violent images and revenge porn/ CSAM. Thi technology does not merit any special carve out in the laws. It requires far more regulation. not less.

Thank you,

Simini Blocker
