Do we need AI oversight? Yes Why? People are losing jobs and jobs that pay enough for house maintenance, groceries for a family of four, utilities, taxes, insurance and medical expenses are hard to find. How about government makes it a priority for companies to create efficient humanoids that can help families pay for these costs? How can humanoid generate revenue? A government AI trust could pay quarterly dividends to households based on AI productivity, provide support to families to own/hire humanoids to help farming etc
