To whom it may concern,

My name is Sophia Echavarria and this is a terrible idea. I do not believe AI holds a place in the future of the US. AI is actively making Americans worse at critical thinking and removing the need for critical thinking and reading skills in our population.

AI steals from my livelihood as an American and profits off of theft of original works. This will set a precedence that copywrite means nothing anymore and content theft and copyright infringement will no longer be punishable by law. It requires energy and water that should be going to American residents and tax payers, creating additional burdens on our already suffering environments.

AI is overhyped and is fleecing the eyes of the American public.

If you want to preserve America, you will hold AI companies accountable on all fronts.
