My name is Spring Holbrook, the following are my opinions regarding the AI Action Plan.

AI does not actually help business. It hurts business, and stifles American innovation. AI has not shown to be capable of doing any jobs that require thought and experience. Any job “done” by AI requires a human to come clean it up and make it presentable which is a waste of resources and time and pointless.

Also AI’s “data training” requires work done by humans to function at all period. It is not intelligent. It will not give America the foothold it’s promised. Have any AI companies actually reported positive gains? Because all I see is a lot of wasted money.

AI will set this country backward. It steals its training data from people.

My suggestions for a concrete plan of action is to include very robust copyright protection for ANY data used to train any kind of “AI” system. This means paying the people whose data is being used. It should never be any kind of priority for the country as a whole. It will not make us competitive in the world market.

I also have concerns about the security of private data. Allowing AI to access anything it wants for training only opens the possibilities of Americans being blackmailed for various purposes using their stolen data. There should be robust privacy protections as well and harsh penalties for any company that uses this personal data without permission.

Again my name is Spring Holbrook, and those are my thoughts and suggestions in regards to the AI Action Plan.
