CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am a visual artist, a writer, and a photographer.

Artificial Intelligence technologies in the form of generative AI such as ChatGPT, DALL-E and others rely on theft of the work done by me and millions of other artists and creators.

AI in the form of chat bots and LLMs return wrong answers and false information in up to 60% of queries. Not only does this add to the increasing firehose of misinformation, it is only a matter of time before real people are injured or killed by taking these 'answers' as fact.

These AI technologies allow the creation of fake imagery that enables dangerous political disinformation.

These AI technologies also consume massive quantities of energy, water, and space, endangering the environment.

I believe that for these reasons, the current implementation of these technologies is immoral and unethical and violates copyright law. These technologies should not be encouraged, aided, used, or subsidized by the government in any way.

I also recommend that any company providing or utilizing these AI technologies be required to obtain the written permission of every creator for each and every work it wants to use; that these permissions be secured before the company uses it; and that the company should be required to immediately remove from their databases any and all work for which it does not have such permission.

But I do not, obviously, give anyone permission to feed this document into a so-called "A.I." database or program.

Thank you.
