Subject: [External] AI Action Plan
Date: Sunday, March 16, 2025 3:47:28 AM

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Any tax-payer supported AI plan must include the following protections for citizens of the United States:

--data centers, energy consumption and efficiency: Energy demands of AI must be lowered, through use of wind, solar and other renewable fuels. A query for AI tool should use energy at as close a rate to a web search as possible.

--Life and death decisions: AI tools must be banned from final decision-making in any issue that is potentially life-threatening: this means benefits (social security, medicare, medicaid, SNAP) as well as medical insurance coverage decisions. There must always be fast remedies to appeal an AI-made decision.

--Protection of personal data and intellectual property: AI tools should have no more allowed access to personal data and intellectual property than any private corporation.
