**Re: Request for Information on the Development of an Artificial Intelligence (AI)
Action Plan (2025-02305)**

Dear Ms. Plimpton,

Volvo Group writes in response to the National Science Foundation Networking and Information Technology Research and Development National Coordination Office's Request for Information ("RFI") on the "Development of an Artificial Intelligence (AI) Action Plan," which was submitted on behalf of the Office of Science and Technology Policy ("OSTP")¹. Volvo Group fully supports the Trump Administration's commitment to maintaining American leadership in AI and recognizing its potential to drive innovation and economic growth. As a company at the forefront of transportation technology, we believe that AI is essential to the future of transportation solutions, and the optimization of our transportation and energy infrastructure.

Volvo Group has made significant strides in leveraging AI to accelerate the deployment of modern transport solutions. Our AI-driven solutions enhance fleet management, improve vehicle maintenance, and increase safety—further demonstrating the crucial role AI plays in advancing transportation. Volvo Group's autonomous trucks, already operational in real-world environments, exemplify the practical benefits of AI in boosting productivity and safety on America's roads.

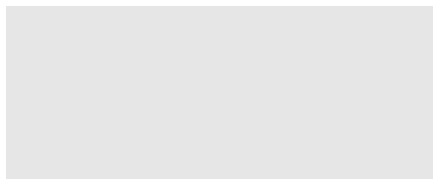

We encourage the Administration to incorporate specific recommendations for autonomous and connected transportation solutions into the AI Action Plan, recognizing their importance in addressing challenges such as road safety, supply chain and energy efficiency. It is vital that we maintain a pro-innovation environment, where policies support AI advancements and allow the private sector to drive solutions. A clear and

¹ Request for Information on the Development of an Artificial Intelligence (AI) Action Plan, 90 Fed. Reg. 9088 (Feb. 6, 2025). This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.

consistent federal framework will foster competitiveness, encourage investment, and keep the U.S. ahead of global competitors.

In line with the Administration's goals, Volvo Group is committed to developing AI solutions that not only enhance transportation efficiency but also promote economic growth, national security, and a sustainable future. We stand ready to work with the government to ensure that AI technologies are developed responsibly, while securing America's position as a leader in the global transportation industry.

Kind regards,

Aravind Kailas, Ph.D.
Advanced Technology Policy Director

Volvo Group North America
